**Declaration of Risks,
related to Participation in project SKYWAY**

The aim of this declaration is to provide investors with the information about the risks associated with the concluding of the Secure Investment Contract or the financial transactions within the framework of the Client Agreement, and to warn about possible losses in the implementation of investment in Project SKYWAY.

The risks in this Declaration refer to the possibility of the Investor's financial losses (in the form of actual damage and/or loss of profits) arising directly or indirectly from the investments or payments.

The investor is aware that investing in project SKYWAY involves certain risks, for which the responsibility cannot be attributed to the Company, GTI, Guarantor or ERSS because the possibilities to anticipate and prevent the consequences of such risks are limited. In this regard, the investors should independently evaluate the opportunities of their investments, and the Company will make every effort to help the investors reduce the risks of investing in project SKYWAY according to the Secure Investment Contract.

1. Economic risks for the investor are as follows:

- **the risk of loss of the expected income** - the possibility of occurrence of an event that involves the partial or complete loss of expected income from Shares (loss of revenue);
- **the risk of losing the invested funds** - the possibility of occurrence of an event that involves the partial or complete loss of the funds (cash and/or Secured shares);
- **the risk of excessive loss of invested funds** - the possibility of an event, which entails not only a complete loss of expected income and invested funds, but also loss exceeding the invested funds;
- **liquidity risk** - the possibility of financial loss upon receipt of Secured Shares due to changes in assessment of their quality (the Secured Shares may not be required by the market to the extent necessary and in a reasonable time limit without a loss in value, and/or assessment may be difficult);
- **the risk of not achieving the investment objectives** - the possibility of financial loss arising from failure to reach the Investor's investment goals. Due to the fact that the Company does not provide any guarantee to the preservation and increase of capital, the Investor can not be guaranteed the level of increase in funds that the Investor wishes to achieve. The Client may lose part or all of the Investment. The Client is fully aware of the risks covered in this paragraph, independently selects the packages of Shares (amount) to purchase, in accordance with his/her investment goals and objectives, and is solely responsible for his/her choice.

2. Other forms of risks:

- **Economic risk** - the risk of unfavorable events of economic nature, concerning the Client. Such risks should be allocated as follows:
 - **Price risk** - the risk of incurring financial losses by the Client due to unfavorable changes in prices of the Secured Shares;
 - **Currency risk** - the risk of incurring financial losses by the Client due to unfavourable changes in exchange rates;
 - **Inflation risk** - the risk of incurring financial losses by the Client due to inflation;
 - **Liquidity risk** - the risk of incurring financial losses by the Client because of difficulty with the sale of the Secured Shares at a certain time;

- **The risk of collection of fees and other charges** - the possibility of financial losses by the Client associated with the Client's complete or partial lack of information on the costs associated with the implementation of operations in the Cabinet. Before performing certain operations, the Client must take all necessary steps to obtain a clear view of all commissions and other fees to be charged to the Client. The amount of such fees may be deducted from the Payments or otherwise increase the Client's expenses.

- **Legal risk** - the risk of incurring financial losses by the Client because of the entry into force of new or changes to existing legal acts. The legal risk also includes the possibility of the Client's financial losses due to the absence or lack of clarity of normative legal acts, directly or indirectly regulating the activity in the securities market. Such risks also need to be identified:

- **Risk of tax laws** - the risk of financial losses by the Client, associated with the use of the current tax legislation, changes in the existing order of taxation of transactions in the stock market. The position of the tax authorities on certain issues may undergo significant changes that, in turn, increase the likelihood of adverse effects on the Client, investing in project SKYWAY.

- **Socio-political risk** - the risk of incurring financial losses by the Client, associated with the change of political and economic policy, the risk of political instability, social unrest, including the risk of strikes, risks the outbreak of hostilities, etc. The most radical changes may lead to a denial or postponement of execution by Euroasian Rail Skyway Systems Holding Ltd of its obligations under the Secured Shares, to the limitation of certain (e.g. foreign) investments, and possibly to the confiscation or nationalization of the property of certain categories of Clients.

- **Crime risk** - the risk of incurring financial losses by the Client, caused by unlawful acts of third persons, including the risk of fraud against Client's assets (e.g. debiting of the Client's Secured shares on the basis of forged documents, unauthorized by the Client access to his/her personal Cabinet, and the like);

- **Operational risk (technical, technological, personnel risk)** - the risk of incurring direct or indirect financial losses by the Client due to failure of information, electrical and other systems, including life support systems, remote access systems, software, telecommunications equipment and other technical problems; because of errors related to the imperfection of the market infrastructure, including the operations of technology, management procedures, accounting and control.

The Company is not responsible for any losses incurred as a result of the Client's ignorance of the instructions in the User Agreement.

The Client assumes the risk of making unplanned transactions in the Cabinet in the case of re-sending the order before the receipt of the result of the previous order processing. The Client is obliged to guard passwords and make sure that third parties do not have access to the Cabinet. The Client will be held directly responsible for operations or transactions carried out in the Cabinet, even if it has been used illegally by a third party.

The Client is aware that the information transmitted in unencrypted form (by e-mail, instant messaging), is not protected against unauthorized access.

The Parties shall take into account the risk associated with the possibility of losses in the exchange of messages between the companies and the Client by means of electronic files using e-mail systems.

The list of factors above is not exhaustive, so the Client may incur additional risks associated with the implementation of investment activities within the boundaries of Project SKYWAY.

Risk is an integral part of any investment process. Investing in Project SKYWAY, carried out

by means of equity crowdfunding, belongs to the category of venture capital investments, which means investing money in a promising innovative business, that does not yet have access to the stock market.

This Declaration is not intended to force the Client to abandon investments in Project SKYWAY, but is designed to help the Client to assess the risks of this type of investment and to have a responsible approach to the issue of the choice of investment strategy.

The conclusion of the Client Agreement in the manner prescribed by the Agreement implies that the present Declaration is read and understood by the Client, and the Client is aware of the real risks when making investment decisions.
